Innovaccer: Population Health Platform

Population Health Management

Innovaccer Purpose & Capabilities

Purpose:

- **Automate** the population health management of NGACO patient lives to allow staff to **efficiently** manage these patient's **care, risk, quality, utilization**, and **finance** to achieve **high quality outcomes** while **minimizing expenditures**.

Capabilities:

- Clinical Data Connectivity
- Care Management facilitation
- Dashboarding
- Quality Metric facilitation
- Risk Management facilitation

Innovaccer Uses and Benefits

- ▶ Innovaccer solutions is working to generate further improvements in our KPI's
- ▶ Real-time monitoring of current year RAF score
- ▶ Stratified patients - recapture of HCC's year over year
- ▶ Analytic reporting now being generated monthly through the InGraph solution which equates to a reduction in resource utilization
- ▶ Care Management workload is built based upon ADT feeds which is automated and through stratification of specific patient cohorts
- ▶ Care protocols have been built and provide robust solutions
- ▶ Social Vulnerability Index available and in the future referral processes can be made available through use of this tool
- ▶ Dashboard reports are available and used for provider engagement

Innovaccer Platform Functionality

Available Solutions		
Data Aggregation	High and Rising Risk	SDoH Referral Process*
Quality Data Review	Care Management Productivity	InConnect – Campaign Management*
Utilization Metrics	Patient Level Data Drilldown	Cohort Identification
Connects to EHR's, HIE's, FHIR API's, HL7 as well as other variations	Risk Adjustment	Point of Care Solution
Attribution Logic	Network Leakage	Discharge Driven Care Management - PreManage

*Available but not yet in use

Innovaccer Levers

13 Key levers driving overall population health opportunity

Getting Started

Username & Access

Each partner or group (ie: Summit Pacific, Vancouver Clinic, etc.) will need to designate a single point of contact for user access approvals and terminations.

User Names

- Users are required to have individual logins
- Password recovery tool available
- Innovaccer Support will assist with username/login issues
 - 5 failed attempts or 45 days without utilizing will cause your account to be locked and require email support

Access

- Detailed logs for audit purposes
- Break the Glass feature

*A Form for requesting access will be available closer to end of March as data should be ready in early April

Individual Patient Data

How to View Patient Information

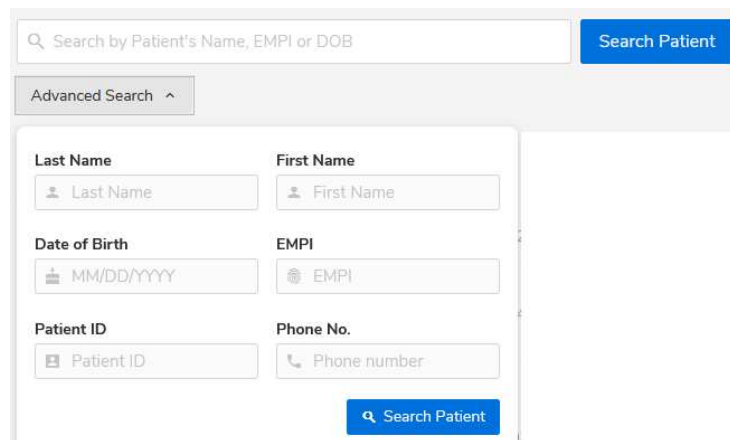

Search for a patient by selecting **“Patients”** from the banner across the top or **“My applications”**

Select **“Search Patient”** or the **“Advanced Search”** option to search for patients by name, date of birth, etc.

Click on the patient's name to view Patient 360

Patient 360 View

Purpose: view of aggregated patient level data (clinical, claims and ADT feeds) used by care management to have holistic view of patients prior to outreach.

Patient Level Risk Detail

Purpose: Provides insight into the patient's risk score and the chronic conditions associated. Identifies and assists care managers in addressing gaps prior to outreach.

Analytics

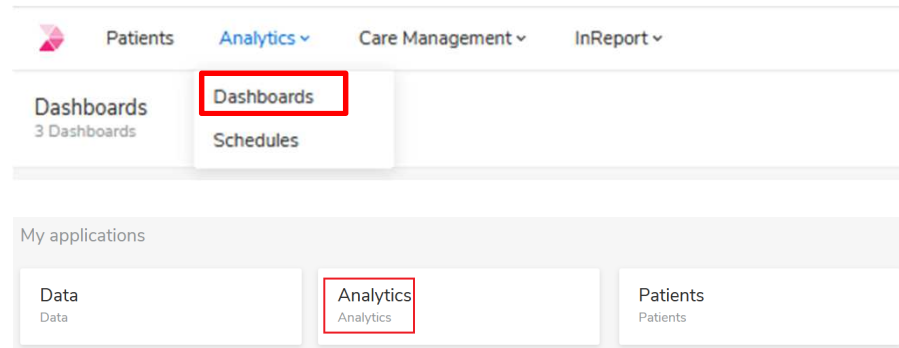

How to Get to Dashboards

Hover on “**Analytics**” from the banner across the top and click on “**Dashboards**”

OR

Choose “**Analytics**” from “**My applications**” in the home screen

Dashboards

To open the dashboard and view the analytics, click “**Explore**”

*Access to certain dashboards is dependent on users' permissions

How to Filter and its Importance

Various data filters are available in the right-side menu to filter what data is being displayed

*There is a 45-day claims lag and we project an additional 45 day incurred but not received (IBNR) lag

Dialog box titled "Edit Filter" with a close button (X) and a filter icon. It shows a "List" sidebar with "Calendar" selected. The main area is titled "Years" and has a dropdown menu. The list contains: 2020, 2019, 2018, 2017, 2016, and 2010. At the bottom, there is a blue button labeled "2020" and a green button labeled "OK".

Dialog box titled "Edit Filter" with a close button (X) and a filter icon. It shows a "List" sidebar with "Calendar" selected. The main area is titled "Months" and has a dropdown menu. The list contains: 12/2020, 11/2020, 10/2020, 09/2020, 08/2020, 07/2020, 06/2020, 05/2020, 04/2020, 03/2020, and 02/2020. At the bottom, there is a blue button labeled "Include all" and a green button labeled "OK".

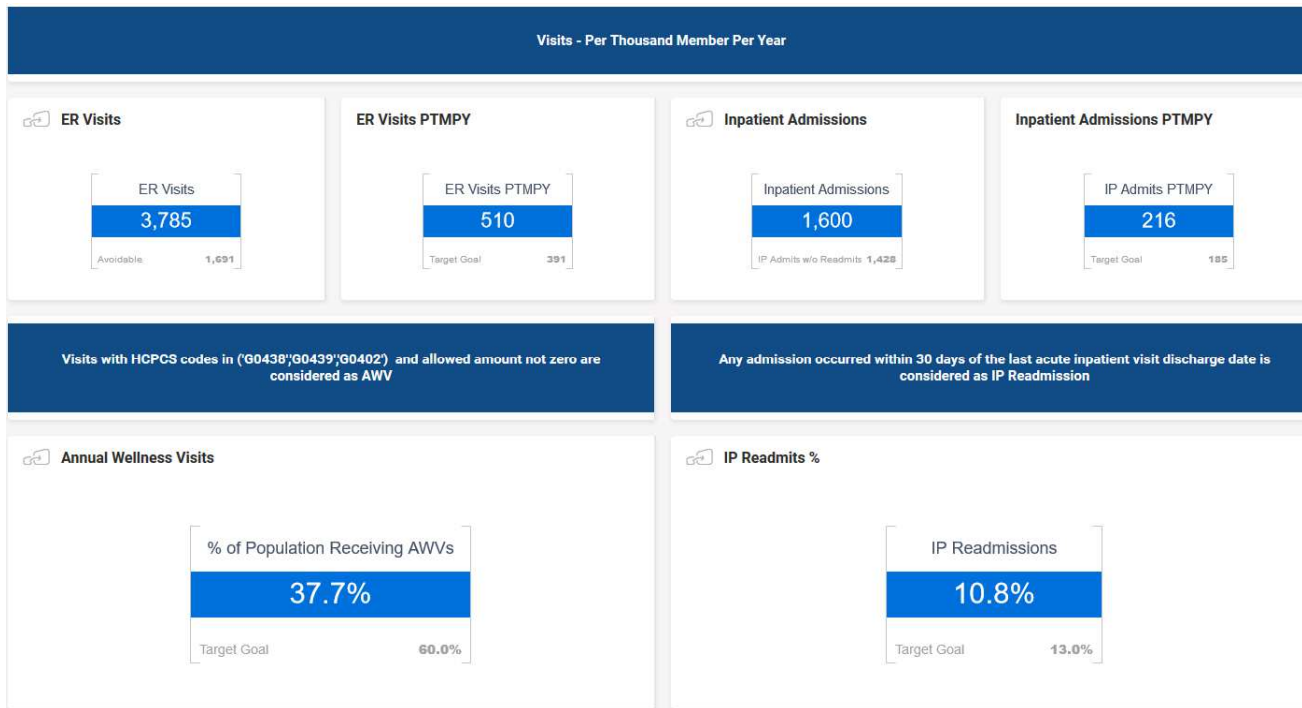

The "Filters" menu is shown on the right side of the interface. It includes a refresh icon and a menu icon. The filters are organized into sections: "Measurement Period" with a blue button for "2020" and a toggle switch; "Organization" with a blue button for "PSW"; "Line of Business" with a blue button for "Include all"; "Area of Service" with a blue button for "Include all"; "Clinic" with a blue button for "Include all"; and "Provider" with a blue button for "Include all". A toggle switch is visible at the bottom of the menu.

Scorecard Dashboard

Purpose: to monitor clinic and provider utilization performance based on attributed population

Metrics drill down

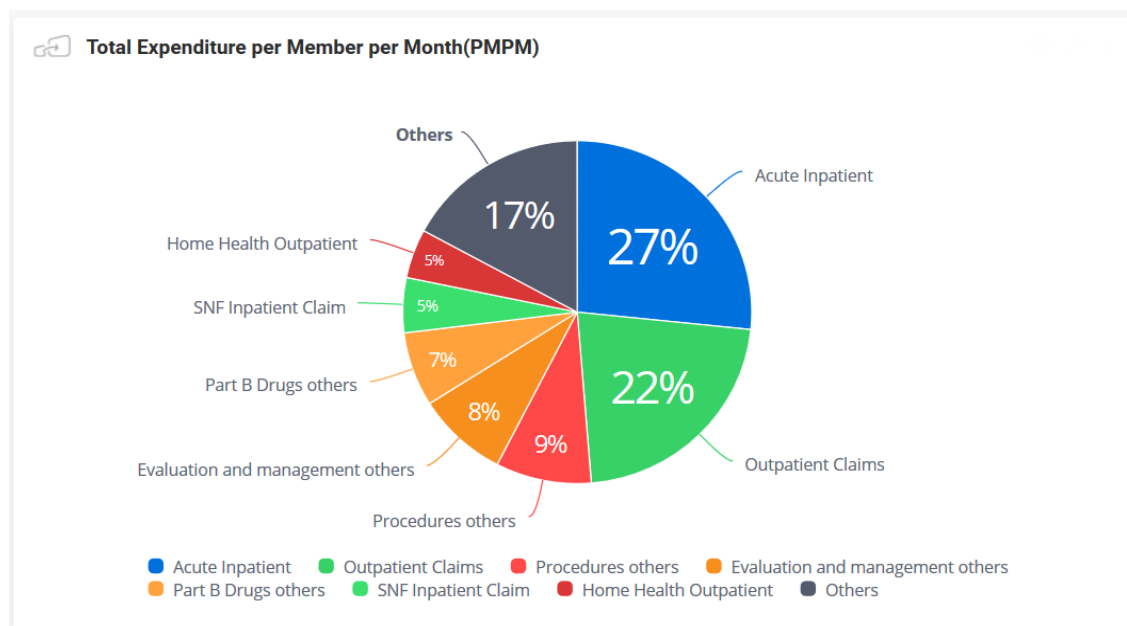

- Procedure code (level of care) – ER Visits
- Bill Type (identify CAH)
- Utilization counts by patient
- NPI Facility Identifier
- DRG
- Readmit Identifier (patient level)
- Visit Date
- Last AWW Date
- PCP Alignment – AWW
- AWW Code Billed (Initial, Welcome, Subsequent)

Per Member Per Month Dashboard

Categorized Spend

Purpose: evaluate spending trends and monitoring financial performance at clinic and/or provider level for attributed populations, drill down functions available at patient level (i.e: acute care facilities and DRG views) .

Spend type drill down

- Top 10 Diagnoses (each category)
- Patient level detail:
 - Cost
 - Facility based on NPI and Name
 - DRG
 - Bill type
 - Primary procedure

All data can be pulled into csv format for further evaluation.

Emergency Department Dashboard

Purpose: drill down data for potentially avoidable utilization based on NYU algorithm identify high-fliers.

Dashboard - Quality Performance

Purpose: to monitor quality performance, create targets / measures based on contract requirements, prioritize patient level outreach to create campaigns for gap closure. Drill down at provider level with patient level detail.

Dashboard - Quality Performance

Dashboard – Risk

Purpose: to monitor recapture rate and understand risk score trends and assist at the provider and individual patient level in workflow process development.

Risk Populations

Patient Risk Escalation

Each year about 18% of rising risk patient escalate to high-risk patients.

Common Triggers of Rising Risk Escalation

- Unpredicted exacerbation where patient is unable to recover
- Patient unaware of condition or ignores it and therefore is not managing
- Natural deterioration based upon based upon managed condition

High Risk

Rising Risk Identified Patients

Innovaccer Risk Dashboard NGACO Population

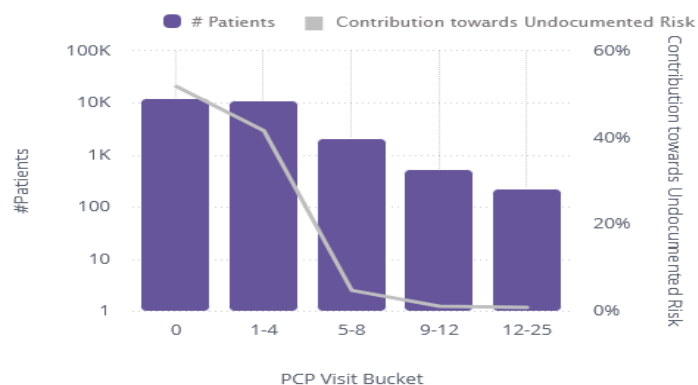

Disease	# Patients	Prevalence
Diabetes	4205	26.7%
CHF	2329	14.8%
Cancer	2452	15.6%
COPD	2248	14.3%
Chronic Kidney Failure	1699	10.8%
Morbid Obesity	1245	7.9%
Ulcer	611	3.9%
Cardiac Respiratory Failure	553	3.5%
End Stage Renal Disease	54	0.3%
HIV/AIDS	3	0.0%

Rising Risk Variables

Innovaccer Risk Dashboard: A Case Study Example

PCP Visit Distribution

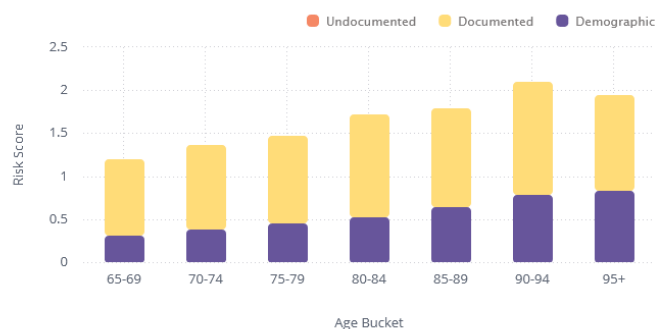

Managing disease states: understand and filter on several factors:

- PCP Visit distribution
- Age grouping

Additional filtering options:

- Annual Physical or Wellness Visit Completion
- Open care gaps
- Undocumented diagnosed chronic conditions year over year

Risk Score Breakdown

CASE STUDY EXAMPLE:

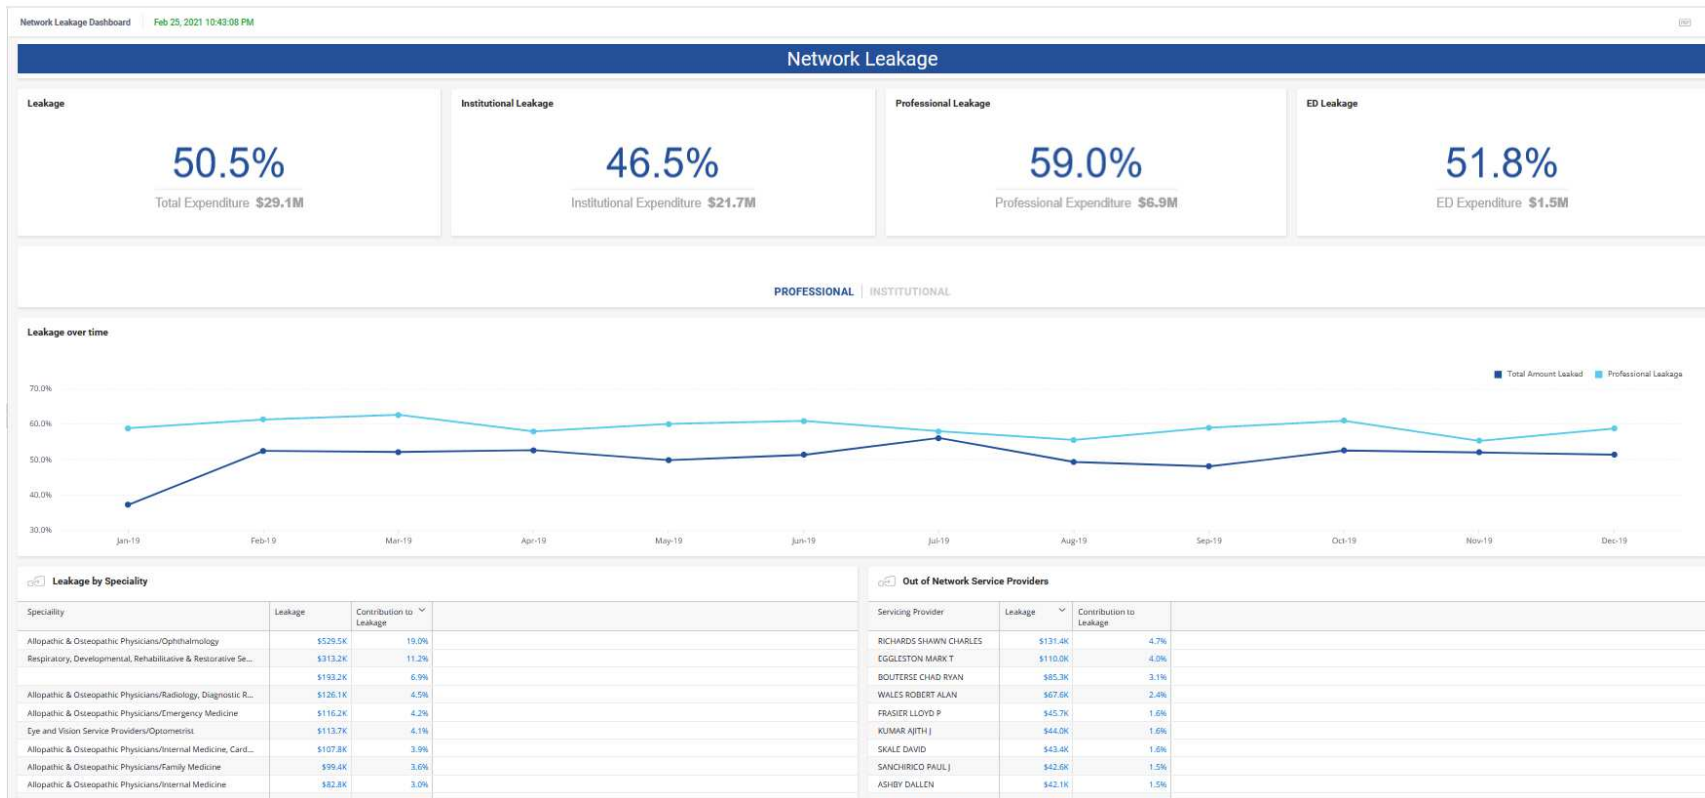

Data → **Actionable Information**

- Filter on the Chronic Kidney Failure population of 1699
- Look at the age group between 65 and 69 where a patient did not have a PCP visit in 2020, needs an AWW, and has nine or more open care gaps.
- Narrows patient list from **1699 to six patients** needing outreach.

Dashboard – Network Leakage

Purpose: to provide insight into current network utilization, understand leakage by DRG and facility as well as specialty and provider allowing for potential future contracting

Optional Modules: InNote

InNote

- EHR Ribbon or Pop-up for Point of Care solution
 - 1 click to close
- Care Gaps
 - Presents care/measure gaps for care planning and improved quality outcomes
 - Presents potentially dropped diagnosis codes identified for clinical documentation improvement
 - Shares patient education opportunities through analysis of ED utilization
- Patient search function available
